CHS	HMB-NPU-MDS	Bruce Psaty	Russell Tracy	A CHS co-author will take responsibility for submitting a penultimate draft to the CHS Publications Committee for review via the CHS website (https://chs-nhlbi.org/node/add/non-standard). The draft should have a mature author list and include the correct acknowledgements. For consortium-based papers and meta- or pooled-analyses, manuscripts are granted an expedited review (7-10 days) in which the submitting author serves as the primary reviewer who assures that: (1) CHS is correctly represented, (2) genetics exclusions are adequately described, (3) the inclusion or exclusion of the minority cohort is properly addressed, and (4) that the content of the paper matches the original proposal. Alternately, TOPMed papers that use CHS data that are without a CHS co-author (i.e., those in which no CHS author accepted an invitation to participate), should be submitted directly to ecterry@uw.edu . The cover note should include contact information for the lead author, the full authorship listing, and an abstract, and the four assurances listed above. In addition, the cover note should address the following points: - The paper derives from the: TOPMed omnibus- Where the analysis was performed- The name of the analyst- That it is an ancillary study (Psaty, AS#238)- The study type is: ancillary, meta-analysis/pooled analysis- Manuscript key words: TOPMed, [phenotype]- Confirm that ancillary studies are credited and that CHS is correctly represented- Indicate whether you or any member of the WG intend to patent any process, aspect, or outcome of these analyses- Indicate whether analyses involve a for-profit corporation- Confirm that the paper includes the required genetic exclusions	phs001368	12-Nov-20	confirmed submitted 11/12; provided approval to submit to TOPMed P&P, see attached emails.
FHS	HMB-IRB-MDS,HMB-IRB-NPU-MDS	Vasan S. Ramachandran	L. Adrienne Cupples	Papers should be sent to Ann Walsh (walshac@nhlbi.nih.gov) and Karen Mutalik (kmutalik@bu.edu).	phs000974	10-Nov-20	Approval by PIs, see attached letter. Draft sent to PI, study co-authors & individual in Instructions (Col G).

GeneSTAR	DS-CVD-IRB-NPU-MDS	Rasika Mathias		We have a Steering Committee in place for all GeneSTAR publications. You may initiate this Steering Committee Review by emailing the TOPMed Study PI Dr. Rasika Mathias (rmathias@jhmi.edu)	phs001218	11-Nov-20	Steering Committee approval received; see attached letter.
GENOA	DS-ASC-RF-NPU	Sharon Kardia	Jennifer Smith	GENOA does not have a formal review process. However, we request that the GENOA co-author(s) included on the paper approve the manuscript prior to submission.	phs001345	8-Nov-20	Draft sent to PIs, study co-authors approved, see attached email.
HyperGEN	GRU-IRB,DS-CVD-IRB-RD	Donna K Arnett		Manuscripts should be sent to steven.claas@uky.edu.	phs001293	15-Nov-20	Approval by PI, see attached letter. Draft sent to PI, study co-authors & individual in Instructions (Col G).
JHS	DS-FDO-IRB-NPU,HMB-IRB-NPU,DS-FDO-IRB,HMB-IRB	Adolfo Correa	Laura Raffield	https://www.jacksonheartstudy.org/Research/Publications#submit manuscript	phs000964	20-Nov-20	PI approval to submit, see attached email.
MESA	HMB,HMB-NPU	Jerome Rotter	Stephen Rich	Manuscripts (penultimate drafts) need to be sent to the MESA Genetics P&P Committee for review (typically for appropriate statement of MESA and its funding sources) with contact Jane Fulcher (genpp@uw.edu)	phs001416	12-Nov-20	PI approval to submit to TOPMed; and submitted to MESA P&P 11/12, see attached email.
Samoan	GRU-IRB-PUB-COL-NPU-GSO	Stephen McGarvey		If data from the Samoan study are used, then contact the overall PI, Stephen McGarvey at Brown University. Email is above, or phone 401-863-1354	phs000972	10-Nov-20	Approval by PI, see attached letter. Draft sent to PI, study co-authors, see Email to co-authors.
WHI	HMB-IRB-NPU,HMB-IRB	Charles Kooperberg	Alex Reiner	Any TOPMed paper using WHI data and/or including WHI co-authors needs to be reviewed by the WHI P&P committee. To initiate the review, email the (penultimate) manuscript to WHI P&P asking for review of the paper, cc-ing Charles Kooperberg .	phs001237	16-Nov-20	Draft manuscript sent to WHI co-authors, see attached email. Manuscript submitted to P&P for expedited review
