Dear TOPMed Colleagues,

Sidd Jaiswal, Alex Bick, and I are delighted to share this manuscript on estimating the rate of clonal expansion in clonal hematopoiesis of indeterminate potential (CHIP) carriers. We developed a method for estimating clonal expansion using the TOPMed whole genomes and used the method to perform association analyses with germline variants.

Extended Figures: <https://drive.google.com/drive/folders/1dh06YvEGxxRI6RhZ6kuTov1QjJqUzumi?usp=sharing>

Supplement: <https://drive.google.com/drive/folders/18G21Nx0OjJsUbPI-waWR2YBkbSx7s3pL?usp=sharing>

Study Specific Acknowledgements: https://drive.google.com/file/d/1sJ_ULheUXuv_oA3qYvyK-_tdT3U-cDak/view?usp=sharing

As per TOPMed custom, we welcome contributing cohorts to nominate 3 authors from their cohort to be specifically included in the authorship (in addition to acknowledging all TOPMed consortium contributors via the banner authorship). By May 31, please add your nominated colleagues to this authorship spreadsheet : <https://docs.google.com/spreadsheets/d/1R6JeX15Geds1-HXmUcDsMbUq4hEsk4zwsTZSnyxhv8o/edit?usp=sharing>

We also request the initiation of any cohort level P&P procedure. We will follow up with any cohort that has indicated this is required next week about this.

Please send any comments or questions to me, Sidd (sjaiswal@stanford.edu), and Alex (alexander.bick@vumc.org).

Sincerely,
Josh, Sidd, and Alex
