

MEMORANDUM

To: Xihao Li

From: JHS Publications & Presentations Committee

Date: July 18, 2023

RE: Manuscript Review (M1405: A statistical framework for powerful rare variant multi-trait analysis in large-scale whole-genome sequencing studies)

The JHS Publications and Presentations Committee reviewed your manuscript and it has been **accepted as is**.

Manuscripts with National Institutes of Health (NIH) author/co-authors must be reviewed by the National Heart, Lung, and Blood Institute (NHLBI). In this case, the lead author must send the manuscript and a copy of the PPS letter of approval via email to NHLBI at nhlbi_ebpdocs@nhlbi.nih.gov and copy the Project Officer, Sharon Smith, at smithsh1@mail.nih.gov before submission to a journal for publication.

Please refer to the [procedures](#) for JHS publications and presentations, including required study acknowledgments and disclaimers, for additional information.

You must **adhere** to the following [NIH Public Access Policy](#). NIH-funded investigators shall submit to the NIH National Library of Medicine's (NLM) PubMed Central (PMC) an electronic version of the author's final manuscript, upon acceptance for publication, resulting from research supported in whole or in part with direct costs from NIH. NIH defines the author's final manuscript as the final version accepted for journal publication, and includes all modifications from the publishing peer review process. The PMC archive will permanently preserve these manuscripts for use by the public, health care providers, educators, scientists, and NIH.

Thank you for collaborating with the JHS.
